Municipal Airport
Waterloo, Iowa 50703

ISSUED: April 10, 2004

EFFECTIVE: April 10, 2004

WATERLOO ATCT LETTER TO AIRMEN NO. 04-1

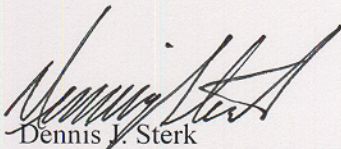

SUBJECT: VFR PRACTICE INSTRUMENT APPROACHES

CANCELLATION: April 10, 2006

Standard separation is provided to VFR aircraft conducting practice instrument approaches at Waterloo and the following airports: Charles City, Independence, Iowa Falls, Marshalltown, Oelwein, and Waverly. The controlling facility is the Waterloo Air Traffic Control Tower. The frequency for all airports will be Waterloo Approach Control frequency 118.9, except Marshalltown uses 120.9 (Waterloo Approach Control). This service is provided during the operational hours of the Waterloo Tower.

Separation to aircraft practicing instrument approaches commences when the authorization to conduct such an approach is issued by Waterloo Approach Control. It is still the pilot's responsibility to comply with FAR's regarding see and be seen. Additionally, the pilot is responsible to change to the advisory frequency in a timely manner.

This Letter to Airmen supersedes all previous Letters to Airmen for the above-mentioned airports regarding this subject.

Dennis J. Sterk
Air Traffic Manager, Waterloo Air Traffic Control Tower
